

Datasheet ZK-Transmitter

The meflex ZK-transmitter is an extreme solid gear rack transmitter, which can be used for big strokes and high operating loads. With its high number of configuration options like notches or the pull-back of the lever with springs it can be composed individual according to the application.

Mechanical data	
Dimension	76 mm x 76 mm x 32 mm
Pivoting angle	224°
Ratio	1:0,403 mm
Maximum stroke	90 mm
Cable type	A, B, C
Low maintenance	
Mounting	2 x Screws M6

Operating range and proof of conformity	
Operating temperature	see cable type
Seal tightness	splashwaterproof
Maximum load	see cable type

Options
Self retention; optional adjustable
Ball notch
Positive notch
Lockable in every position
Pullback spring
Load-torque lock
